

Critical Access Hospitals and Frontier Designated Areas

2010

Revised: March 21, 2013

Notes: Instead of Counties, California uses Medical Service Study Areas, Hawaii uses sub-county areas, and Arizona uses RUCAs; state offices of rural health designated frontier areas in 2012 using US Census data from 2010; Critical Access Hospital data is for Q4 2012 from CMS and geocoded by UMC-CARES; scale bar is correct for all 50 states
